

Arc Light - York

Project:
Homeless Accommodation
Location:
York
Client:
York Housing Association
Consulting Engineer:
Alan Wood & Partners
Architect:
Bauman Lyons Architects
Project Value:
£ 2.5 million

Description:

Alan Wood & Partners were engaged to provide structural services including foundation, superstructure and drainage design.

The Arc Light project was funded by Central Government (the Housing Corporation and the Department of Communities and Local Government) for York Housing Association and Arc Light will provide the service.

This is a direct access hostel and the accommodation offers "state of the art"

emergency accommodation for single men, women and couples without children.

The time and budget constraints on the project necessitated the adoption of a simple and cost effective load bearing masonry structural solution.

Alan Wood & Partners worked closely with the design team to deliver cost savings and design solutions to meet an evolving client brief and budget.
