

# Exhibition Centre - University of York

**Project:**

Refurbishment of the Exhibition Centre

**Location:**

University of York

**Client:**

University of York

**Consulting Engineer:**

Alan Wood & Partners

**Architect:**

Scarborough Design

**Project Value:**

£350,000.00

## Description:

The Building Surveying team from Alan Wood & Partners worked alongside the interior designer, asbestos consultant, electrical and mechanical designers in designing and managing the refurbishment of the conference and exhibition facilities.

Key factors in the design and specification process included rearrangement of fire barriers after asbestos removal, creation of

fire resisting glazing and door systems, and integration of the interior design within the existing structure and fabric of this 1960's CLASP building.

The project ran during term time and was managed to coordinate with the examination timetable and conference bookings.
