

Langwith College - York

Project:

Refurbishment of Exhibition Centre

Location:

University of York

Client:

University of York

Consulting Engineer:

Alan Wood & Partners

Architect:

Scarborough Design

Project Value:

£400,000.00

Description:

Alan Wood & Partners Building Surveying team were appointed to work with the interior designer and others in the refurbishment of the main walkthrough section of Langwith College to provide a bright and cheerful environment for students and staff.

Significant issues with the design and management of the work was the rearrangement of fire barriers after asbestos

removal, replacement of windows with ones having special decorative glass, and provision of improved disabled access and improved thermal insulation.

We worked closely with the interior designer to make the designs work within the structure of the 1960's pre cast concrete panel and steel frame building.
