

Regeneration of Daneshouse - Burnley

Project:

Regeneration of Daneshouse

Location:

Burnley

Client:

Gleeson Regeneration

Consulting Engineer:

Alan Wood & Partners

Project Value:

£15 million

Description:

Alan Wood & Partners were appointed by Gleeson Regeneration as their Consulting Engineers for the regeneration of the Daneshouse area of Burnley.

This involved the demolition of areas of former housing and some light industrial units and the construction of approximately 150 new houses and associated infrastructure.

Alan Wood & Partners carried out Phase 1 Desk Studies on the sites and a series of Phase 2 site investigations to assess ground conditions and requirements for remediation as well as rotary drilling to assess the risk from shallow coal workings.

In addition to the above work Alan Wood & Partners also carried out the foundation design for the scheme and validation testing of the capping prior to occupation.
